

**RESOLUTION NUMBER L-2007-17**

**Update to the Georgetown Fire Protection District  
Sphere of Influence**

**LAFCO Project No. 2007-04-F**

**AMENDED (2)**

**WHEREAS**, the Cortese-Knox-Hertzberg Local Government Reorganization Act of 2000 governs the organization and reorganization of cities and special districts by local agency formation commissions established in each county, as defined and specified in Government Code Sections 56000 et seq. (unless otherwise indicated all statutory references are to the Government Code); and

**WHEREAS**, Section 56425 et seq. provides that the local agency formation commission in each county shall develop and determine the sphere of influence of each local governmental agency within the county, and enact policies designed to promote the logical and orderly development of areas within the spheres of influence, as more fully specified in Sections 56425 et seq.; and

**WHEREAS**, Section 56430 requires that local agency formation commissions conduct a municipal service review (MSR) prior to, or in conjunction with, consideration of actions to establish or update a sphere of influence (SOI) in accordance with Sections 56076 and 56425; and

**WHEREAS**, pursuant to Section 56430, in order to prepare and update spheres of influence, the Commission conducted a Countywide Fire Suppression and Emergency Services Municipal Services Review and adopted a written statement of determinations on August 23, 2006; and

**WHEREAS**, the agencies reviewed were County Service Area 7, City of South Lake Tahoe, Cameron Park Community Services District, Diamond Springs/El Dorado Fire Protection District, El Dorado County Fire Protection District, El Dorado Hills County Water District, Fallen Leaf Lake Community Services District, Garden Valley Fire Protection District, Georgetown Fire Protection District, Lake Valley Fire Protection District, Latrobe Fire Protection District, Meeks Bay Fire Protection District, Mosquito Fire Protection District, Pioneer Fire Protection District, and Rescue Fire Protection District, among others; and

**WHEREAS**, the Executive Officer reviewed the sphere of influence update pursuant to the California Environmental Quality Act (CEQA), and recommended that the project is exempt from CEQA under Section 15061(b)(3) because it is covered by the general rule that CEQA applies only to projects which have the potential for causing a significant effect on the environment. Where it can be seen with certainty that there is

no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA, and, based thereon, the Executive Officer prepared a Notice of Exemption; and

**WHEREAS**, the Executive Officer set a public hearing for June 27, 2007 for consideration of the environmental review and the draft sphere of influence update for Georgetown Fire Protection District and caused notice thereof to be posted, published and mailed at the times and in the manner required by law at least twenty-one (21) days in advance of the date; and

**WHEREAS**, on June 27, 2007 the draft sphere of influence update came on regularly for hearing before LAFCO, at the time and place specified in the Notice; and

**WHEREAS**, at said hearing, LAFCO reviewed and considered the draft sphere of influence, and the Executive Officer's Report and Recommendations; each of the policies, priorities and factors set forth in Government Code Section 56425 et seq.; LAFCO's Policies and Guidelines related to spheres of influence, starting with Policy 4.0; and all other matters presented as prescribed by law; and

**WHEREAS**, at that time, an opportunity was given to all interested persons, organizations, and agencies to present oral or written testimony and other information concerning the proposal and all related matters; and

**WHEREAS**, the Commission received, heard, discussed, and considered all oral and written testimony related to the sphere update, including but not limited to protests and objections, the Executive Officer's report and recommendation, the environmental document and determinations and the service reviews; and

**WHEREAS**, pursuant to Government Code Section **56425(i)(2)**, the Commission does hereby establish the functions and classes of services provided by Georgetown Fire Protection District as follows: fire suppression and emergency services; and

**WHEREAS**, the Commission does hereby make the following determinations regarding the proposal pursuant to Government Code Section 56425(e):

**1. *The present and planned land uses in the area, including agricultural and open space lands.***

The majority of present land use in the GEO area includes agricultural and low density residential uses, although there are small pockets of medium density residential and commercial uses near the Georgetown Community Center. Primarily residential areas within GEO are spread throughout the district; however, residential Wentworth Springs Road, Volcanoville Road and Spanish Dry Diggins / Sliger Mine Roads. Future land uses are expected to remain relatively unchanged, with population growth likely lower than the projections for other unincorporated portions of the Western Slope. The 2004 General Plan encourages future development to remain largely within the community regions of Georgetown and Greenwood.

There are approximately 14,075 acres currently within the GEO sphere that are not within the district boundaries. Of these, approximately 7,040 acres are United States Forest Service land, 6,033 acres are privately owned lands utilized for timber production, 640 acres are owned by the University of California and utilized for forestry research and 326 acres are residential lands designated for agriculture which are largely undeveloped. Of the total 14,075 acres included, only approximately 17.5 acres are designated by the 2004 General Plan specifically for rural residential uses. The remaining acreage is designated to remain in some sort of agricultural production.

Since approximately half of the above land is owned by the Federal Government, fire suppression services are expected to be largely provided by the United States Forest Service. However, GEO is likely to be the primary public fire agency to respond to a fire or medical emergency within the other portion of the areas outside of district boundaries. This creates an issue of fiscal inequity for the district, which does not currently receive any revenue to offset the cost of this service. The GEO chief has requested that these parcels remain within the GEO sphere for now.

The GEO Chief requested that LAFCO include an additional 27 parcels northeast of the current SOI within the updated SOI for future annexation consideration. This would extend the GEO sphere boundaries directly north of the easternmost edge of the sphere, up to the north fork of the American River, enclosing a portion of land that is currently outside of any fire providers' sphere. The area contains land that is currently utilized primarily as timber preserves, held by a variety of landowners including private landowners, the United States Forest Service, the University of California and the Bureau of Land Management. The Chief believes that the territory contains property that is significantly exposed to the risk of wildland fire and may warrant consideration for annexation into the district in the future. The potential annexation would increase service demand; however the district's current staff and equipment appear sufficient to maintain service levels.

**2. *The present and probable need for public facilities and services in the area.***

Parcels currently within the GEO district receive sufficient fire suppression and emergency response services as needed. If annexed in the future, the areas described above would increase demand for these services and it is possible that existing personnel and equipment would not be adequate to meet the level of service required for the inclusion. However, increased revenue, in the form of additional property taxes and assessments received could offset increased costs and ensure the sufficient provision of services to serve the area.

**3. *The present capacity of public facilities and adequacy of public services that the agency provides or is authorized to provide.***

GEO appears to provide adequate fire suppression and emergency response services within and, in cases of mutual aid responses, outside its boundaries. The district is compensated for these services primarily through property taxes, County Supplement Funds and district assessments.

**4. The existence of any social or economic communities of interest in the area if the Commission determines that they are relevant to the agency.**

GEO serves the communities of Georgetown, Quintette, Volcanoville and portions of Greenwood. The areas proposed for inclusion are located largely in the southeast and northern portions of the district, outside of any established community boundaries. Other than Greenwood, there is no social or economic community of interest that would require further Commission consideration of this issue for the sphere update.

**NOW, THEREFORE BE IT HEREBY RESOLVED, DETERMINED, ORDERED AND FOUND:**

Section 1. Each of the foregoing recitals is true and correct.

Section 2. The Notice of Exemption prepared by the Executive Officer is approved as the appropriate environmental document for this project.

Section 3. The update to the Georgetown Fire Protection District's Sphere of Influence to affirm the current sphere along with the inclusion of additional territory is orderly, logical and justifiable. The additional parcels proposed for inclusion are:

062-020-40	063-010-04	063-020-15	063-020-25
062-041-08	063-010-05	063-020-16	063-020-26
062-041-09	063-010-06	063-020-20	063-020-27
062-550-01	063-020-11	063-020-21	063-020-28
063-010-01	063-020-12	063-020-22	063-020-29
063-010-02	063-020-13	063-020-23	063-020-30
063-010-03	063-020-14	063-020-24	063-020-31

Section 4. The Executive Officer is directed to file a Notice of Exemption under Section 15061(b)(3) in compliance with the California Environmental Quality Act and local ordinances implementing the same.

Section 5. The Georgetown Fire Protection District's sphere of influence is updated to affirm its current sphere along with the inclusion of additional territory as shown on the attached map, marked Exhibit A, attached hereto and incorporated herein by this reference.

APPROVED

**PASSED AND ADOPTED** by the El Dorado Local Agency Formation Commission at a regular meeting of said Commission, held June 27, 2007 by the following vote of said Commission.

AYES: Long, Loftis, Briggs, Hagen,  
Humphreys, Norris, Sweeney
